

Shayan Fareed

Product Engineer

sfx.pers@gmail.com | github.com/sfxdeve | linkedin.com/in/shayanfareed | Karachi, Pakistan

PROFILE

I take on the difficult middle, where product decisions, technical constraints, and day-to-day operations meet, and stay with the work until it is out in the world and working as it should. I connect frontend, backend, APIs, and delivery into coherent systems, especially where the requirements are tangled, the trust boundary matters, and the final product has to be useful in the real world.

EXPERIENCE

Freelance Product Engineer

Jan 2025 to Present

Upwork / Remote

- Turn client requirements into full-stack products, shaping product decisions and carrying the work through to release for international clients.
- Connect frontend systems, reusable components, backend integrations, dashboards, and workflows so complex behavior stays clear to users and manageable behind the scenes.

Software Engineer

Oct 2023 to Nov 2024

Jumppace Pvt Ltd / Karachi, Pakistan

- Shipped production web applications with React.js, Node.js, and MongoDB while working across frontend, backend, and shared product decisions.
- Strengthened reusable components and API design so shipped features remained easier to extend and maintain after release.

React.js Developer

Apr 2023 to Sep 2023

AZ Code Arena / Karachi, Pakistan

- Turned Figma designs into responsive React interfaces using JavaScript, HTML, CSS, and reusable component-based UI patterns.
- Connected those interfaces to REST APIs and authentication flows, keeping the final experience stable and usable across devices.

PROJECTS

EcoBuiltConnect

<https://shayanfareed.vercel.app/work/ecobuiltconnect>

Making finite material supply trustworthy enough to buy

ArtisanConnect

<https://shayanfareed.vercel.app/work/artisanconnect>

Keeping local service work accountable from quote to review

RushUploads

<https://shayanfareed.vercel.app/work/rushuploads>
